8.2 Migration / Change of EC 502 / Ofex London to EC 699 / PLUS MARKET London

The new alignment of Ofex with the PLUS MARKET makes the relocation of all instruments **on EC 502 / OFEX to EC 699 / PLUS MARKET effective 23 October 2006** necessary. Exchange code 502 will be deleted later on. An instrument list (MigrationBC502toBC699) can be provided upon request.

Involved systemlist: none

8.3 Migration / Change of all futures and options from EC 213 / Budapest to EC 770

Due to technical issues all futures (security type 25 / P) and options (security type 35 /Z) on EC 213 will be moved to a separate exchange code, which is **EC 770 effective 9 October 2006**. An instrument list is available upon request.

Involved system list: none

8.4 Migration of all bonds and derivate securities of Copenhagen and Helsinki Stock Exchange

The creation of an integrated Nordic and Baltic market by OMX with the alliance of the Baltic, Copenhagen, Helsinki and Stockholm exchanges has resulted in the consolidation of listing and fee requirements. It involves the relocation of certain instruments to separate exchange codes as described below. This migration will take place **on 2 October 2006**.

a) BC 12 / Copenhagen Stock Exchange / bonds and derivative instruments:

- **all bonds** (Fixed Income) will be moved **from EC 12 to the new EC 741**. An instrument list is available upon request.
- **All Futures and options** (security type 25/P and 35/Z) will be moved **from EC 12 to the new EC 743**. An instrument list (Derivat_BC12) can be provided upon request.

8.5 Reorganization of the U.S. exchange traded funds

Deletion of multiple valoren numbers for existing exchange traded funds:

Currently, U.S. exchange traded funds listed on EC's 65 – 67, 70, 77, 94, 98, 318, 321, 736 and 737 are being processed on several individual security codes (valoren) with different price types, which creates a problem to find all the necessary data on the primary security.

Therefore, it is planned to consolidate these multiple security codes by migrating the different price types to one security code / ISIN number. The redundant security codes (valoren) will be deleted. This reorganization is scheduled **for 9 October 06**.

An instrument list is available upon request.

8.6 Migration / Change of exchange codes OPRA

OPRA – Standardization of the data supply for U.S. equity and index options:

Current exchange codes: EC's 72, 74, 78, 95, 360, 574

New exchange codes:

separate exchange code 771 for all indices of OPRA.

separate exchange code 819 for all options on equities and indices.

- **The indices on EC's 72, 74 and 360 will be migrated to EC 771.** An instrument list (MigrationOPRAtoEC771) can be provided.
- **All options on equities and indices on EC 72, 74, 78, 95, 360 and 574 will be migrated to EC 819.**

Current number of instruments: approx. 900'000 option contracts on 6 exchange codes

New number of instruments: approx. 230'000 option contracts consolidated on EC 819

Each quote and each volume shows the origin exchange in the field „origin market code“ (basic market of OPRA)

Expected implementation date: 11 September 2006 (fixed date change)
